The need for email archival option in email clients  
draft-emailarchiveitoption-std-02

Abstract

This document describes the need for a email archive option  
button or check box in email client to make sure of accountability  
of emails, transmission delivery and control of email SPAM

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at http://datatracker.ietf.org/drafts/current/.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on May 13, 2019.
1. Introduction

This document describes the need for an email archive option button or check box in email client to make sure of accountability of emails, transmission delivery and control of email SPAM.

2. Background

If I send an email from pradeepan88@hotmail.com to sovereignamber@hotmail.com there is no guarantee it would be delivered, there is no proof that pradeepan88@hotmail.com wrote it, there is no guarantee originator is spam. I received emails from efcc.nigeria.org@representative.com about an ATM valued 8.3 million dollars issued to be in Feb 2013 I responded followed their instructions and still does not have the ATM instead I was harmed in low class western medical hospitals and the email pradeep@explodingmoon.org I used disabled by disabling the website for nonpayment. If my email client had an archive checkbox then archive.org can be used to archive it.

3. General Information of the service

Nowadays backup is not costly as terrabytes can be obtained for dollars and not millions. I am stranded outside my natural land of California because of racist criminals stealing my money and using a birth place and the criminals there to exploit it and having been sending many SOS emails. I have send emails with evidence of crime to many authority emails. I do not have a solution by delivery of money and is being stolen. The authority recipients cannot held liable as theres no evidence to public i have reported the crime. If for every email for which the sender checks in archiveit option as a checkbox or button then i can hold the authorities liable and punish them for financial crime if it is archived in a specific URL in archive.org that can be derived from the email.
